PROFILE SUMMARY

I'm a motivated Full-Stack JavaScript Developer/Student with practical experience handling clients and a passion for innovation. I'm committed to expanding my skills and collaborating effectively with colleagues to deliver quality results.

TECHNICAL SKILLS

- Proficient in JavaScript, TypeScript, PHP, SQL
- Experienced in Postman testing
- Development with Vue.js, Nuxt.js & React.js
- Experience with Google & Azure Cloud Platforms
- Skilled in debugging & troubleshooting software
- Experience with Node.js, Express.js & MongoDB
- Shell scripting with bash
- Automating tasks using Google Apps Script
- Web designing with Figma, Bootstrap & Tailwind
- Version control with GIT

PROFESSIONAL SKILLS

- Problem Solving
- Time Management
- English Proficiency
- Adaptability
- Team Player

WORK EXPERIENCE

IT Specialist/ Junior   August 2022 - July 2023
IT Mind, Kadawatha

- Developed and implemented dashboard web applications using PHP, JS, MySQL & Chart.js, enabling clients to efficiently visualize & analyze their data.
- Responsible for maintaining & supporting multiple WordPress e-commerce websites.
- Implement automation scripts using PowerShell to streamline repetitive tasks, improving efficiency and reducing manual effort by 30%.
- Utilize Google Apps Script to automate tasks and enhance productivity in Google Workspace.
- Install, configure, and maintain hardware and software components, including desktops, laptops & network devices, ensuring optimal performance and security.
- Gained real-world experience by getting to communicate & get feedback from clients.

EDUCATION

                                                                                  2022 - Present
SLIIT, Malabe
BSc (Hons) in Information Technology Specializing in Information Technology

                                                                                  2012 - 2020
Gurukula College/Kelaniya
G.C.E A/Level (Commerce Stream)

CERTIFICATIONS

- API Fundamentals Student Expert - Postman
- Google Cloud skills boost badges
- Responsive Web Design - FCC
- JavaScript Algorithms and Data Structures - FCC
- Front End Development Libraries - FCC
- Back End Development and APIs - FCC

PROJECTS

Library Application

- Description:

Developed a dynamic full-stack library web app with React, Node.js, Express, and MongoDB, enabling effortless book management through CRUD operations.

- Technologies used:

HTML5, JavaScript, Node.js, Express.js, MongoDB, React.js

- Skills gained:

User-Centric Development · API Integration · Hosting · CRUD Operations
· DB Management/Filtering · Debugging · Full-Stack Development

Search API

- Description:

Search API to provide server side search options to the end-users, to ensure reliable and fast filtering & sorting.

- Technologies used:

JavaScript, Node.js, Express.js, MongoDB, POSTMAN

- Skills gained:

Advanced Filtering · Sorting Data · Dynamic Data Population

Task Manager API

- Description:

Task Manager API, a streamlined solution for efficient task management. Built with Node.js, Express.js, and MongoDB, this REST API allows users to effortlessly implement CRUD functions.

- Technologies used:

JavaScript, Node.js, Express.js, MongoDB, POSTMAN

- Skills gained:

API Testing · REST APIs · Asynchronous Programming · Error Handling

GitHub User Finder

- Description:

Using GitHub's API to fetch the data, a simple webpage where users can put in anyone's GitHub username and see their profile information.

- Technologies used:

HTML5, Bootstrap, JavaScript, Axios library

- Skills gained:

JavaScript · Event Handling · Asynchronous Programming · Error Handling · HTTP Request Handling · DOM Manipulation
